

1 **Abstract**

2

3 A method and tool for applying a sheet material to a
4 surface of a structure, and in particular a vehicle. The
5 tool comprises a locating assembly for locating the tool
6 with respect to the structure, the locating assembly
7 including a support frame and translation assembly for
8 allowing relative movement between the structure and the
9 tool. An applicator is supported by the support frame,
10 and applies the sheet material to the surface of the
11 vehicle. The sheet material may be an advertising panel.
